## CITY LIGHTING PLANT BILL.

Measure to Be Introduced in the House of Delegates.

The bill to provide for the installation of municipal lighting plant in the new City Hall will be introduced this evening in the House of Delegates by Mr. Kelly. Friday evening Speaker Cronin will introduce bill to authorize the construction of a plant in the Insane Asylum, to light the group of public buildings on West Arsenal street. Speaker Cronin and Mr. Kelly express conviction that both bills will be passed at say, will receive immediate attention, and will be passed by a large vote. Other Dele-gates who were interviewed also state that the House will approve the bills without any more delay than may be absolutely necessary.

the House will approve the bills without any more delay than may be absolutely necessary.

Mayor Wells yesterday returned the City Hail ordinance to President Phillips of the Board of Public Improvements, with a verbal indorsement of the plan. In order to avoid loss of time, Mr. Phillips decided not to wait for the next meeting of the City Hail Commission, but to have the ordinance submitted at once to the Municipal Assembly. The Insane Asylum ordinance will also be transmitted to the Legislature without the formality of the commission's approval.

The ordinance to be introduced to-night will authorize the installation of a municipal generating plant in the City Hail, to light the City Hail, old City Hail, Four Courts and Jail, Courthouse and downtown enginehouses. The other ordinance will authorize a municipal plant in the Insane Asylum, to light the Insane Asylum, Female Hospital and Poorhouse.

## **NEW FILINGS MADE** IN DRAINAGE CASE.

St. Louis Alleges Persistent Violation of the Congressional Act by Chicago.

UNIQUE PLEA OF DEFENSE.

Illinois's Counsel Asserts That Chicago's Sewage Flows Along the East Shore, Not Affecting St. Louis Water Supply.

The Republic Bureau, 16th St. and Pennsylvania Ave. Washington, May 13.-In the United States Supreme Court to-day, Mr. B. Schnarmacher, counsel for St. Louis, asked leave to file an amended complaint against the operation of the Chicago Drainage Canal, The supplemental bill was submitted, but the decision of the court, as to its filing, was deferred. Violation of Law Alleged.

The new bill reiterates the complaints made in the original and recites all the deelopments which have taken place since that time, and, in addition, avers that "Whereas, under the act of the General Assembly of the State of Illinois authorizing the construction and operation of said channel, it was required that said sewage and filth be diluted with not less than 20,009 cubic feet of water per minute for each 100,000 inhabitants of said sanitary oistrict: the defendant, the sanitary district of Chicago, has not at any time, since the op-ening and operation of said chan-nel, furnished such an amount of water dilution; and that since the 30th day of April, 1901, said defendant, acting under orders of the Secretary of War, has reduced such dilution to not exceed 200,-000 cubic feet of water per minute in the aggregate, or about 10,000 cubic feet for each 100,000 inhabitants of its district and proposes hereafter to limit the maximum dilution to that amount."

To this the counsel for the defendants, Judge Springer, demurred on the ground that they do not have to answer in the Supreme Court for alleged infraction of the laws of the State of Illinois; the only issue properly considered here being as to al-leged pollution of the waters of the Mississippi. Judge Springer asked the court to rule that it is unnecessary to answer this ew allegation.

Agreement on Taking Depositions. An important step in the proceeding has been reached by the agreement of counsel for both sides to the method of taking tea-timony. It is stipulated that this shall be-gin September 9; that the State of Missouri shall have as much time as counsel desire and then that the canal people shall have shall have as much time as counsel desire and then that the canal people shall have such time for answer as they think proper; and following this, Missouri again shall have as much time as Is wanted for re-buttal. The Commissioners are to be ap-pointed by the Supreme Court, and both parties agree to pay expenses of their own witnesses and one-half the stenographic fees for taking the testimony. The Com-missioners are to report only its records of the stenographic testimony and not findings of fact.

missioners are to report only its records of the stenographic testimony and not findings of fact.

The next step in the case will be the decision of the demurrer filed by Judge Springer, which is expected next Monday.

New Defense Offered.

In their answer to the amended complaint of Missouri, the canal people say that they have not, in the operation of the canal, contaminated, polluted or destroyed the water supply of the Mississippi and its tributaries to the people of Missouri; that the waters have been relieved of their noxious character by the natural law relating to sewage and drainage and to running waters in large bodies; and that, if it should appear that the waters of the Mississippi River below the city of St. Louis have been polluted or their value impaired for primary uses or for agricultural, domestic and manufacturing purposes, or so polluted as to injure the health or endanger the lives of the inhabitants of Missouri, such pollution, impairment of value and unhealthful condition cannot be imputed to the defendants in this cause, but, on the contrary, must be imputed to the city of St. Louis, and to its suburban villages and towns, whose aggregate population is over 625,000, or about one-half of the population of the drainage district of the Sanitary District of Chicago, one-half of the population of the drainage district of the Sanitary District of Chicago, whose sewage is now drained into the Des-plaines and Illinois rivers.

Blame Placed on Missouri.

whose sewage is now drained into the Desplaines and Illinois rivers.

Defendants further say that the intake of the Waterworks and water supply of St. Louis is located on the west bank of the Mississippi, only about three miles below the mouth of the Missouri, which river is nearly as large as the Mississippi at the point of confluence; that the waters of the Missouri flow in an easterly direction and bear directly across the Mississippi toward the Illinois shore, pressing upon that shore the water flowing from the Mississippi and Illinois rivers; that by this natural flow of the waters of these rivers, the waters flowing from the Illinois River are pressed upon the east bank of the Mississippi River and do not mix with the waters flowing along the west bank of the Mississippi until said waters have passed the intake of the water supply of St. Louis; that the waters received at the intake of the water supply of St. Louis for pollution is caused by the sewage and filth from the cities and towns are situated in Missouri.

How the Sewage Sneaks Past Us. Defendants further say that the Mississippi at the mouth of the Illinois River is a much larger stream than is the Illinois; that the flow of water from said Mississippi at that point exceeds the flow from the Missouri above its mouth, many of which cities and towns are situated in Missouri.

How the Sewage Sneaks Past Us. Defendants further say that the Mississippi at that point exceeds the flow from the lilinois not not be water from said Mississippi at that point exceeds the flow from the Waters of Lake Michigan; that in consequence of this fact, the waters flowing from the Illinois and above the city of St. Louis, do the waters of the center of the Mississippi, which is the boundary line between Missouri and Illinois.

## COLONEL STICKNEY NAMED.

Appointed President of the Missis sippi River Commission.

Washington, May 13.-On the recommend ation of General Gillespie, Chief of Engi-neers, the President has appointed Colonel

neers, the President has appointed Coionel Amos Stickney, Corps of Engineers, member and president of the Mississippi River Commission, to fill the vacancy caused by the detachment of General Gillespie.

The President has also appointed Lieutenant Colonel Henry M. Adams, Corps of Engineers, a member of the commission, to complete its complement.

Colonel Stickney has been attached to the Mississippi River Commission for nearly twenty years, and has been the senior member since the relief of General Gillespie. He is also president of the Missouri River Commission. He is stationed at St. Louis. Lieutenant Colonel Adams is stationed at New Orleans, and has charge of river and harbor work in that vicinity, including the defensive works at the entrances to Mississippi River and at Sabine Pass, Tex.

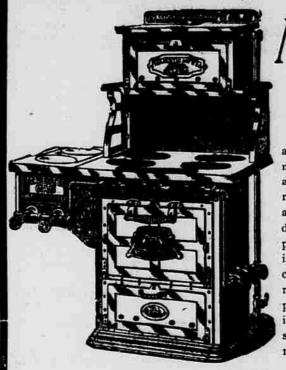

The Secretary of War has stated that the question of location for the headquarters will rest with the commission, but it is regarded as almost certain that the effort to have it moved to Memphis instead of St. Louis will fail.

STATES FIGHT FOR WATER

## STATES FIGHT FOR WATER.

Suit Between Kansas and Colorado Started at Washington.

Washington, May 13.-The long-talked-of sult on the part of the State of Kansas against the State of Colorado to enjoin the atter State from the diversion of the waters of the Arkansas River was begun in the United States Supreme Court to-day. The case must originate in the Supreme Court, because of its interstate character. Assistant Attornew General West of Kan-ans presented a motion for leave to file a You Wouldn't Buy a Gas Range Until You Had Seen the

# MAJESTIC

Gas Range.

Every square inch of material in a Majestic is heavier, and better quality than other gas ranges. Nearly all the material is malleable iron and steel, and there is no breakage, which is one of the chief annoyances with other gas ranges. The Majestic Gas Range is lined with a heavy asbestos board, not paper, which holds the heat and cuts down the amount of gas required to keep the oven the proper temperature, thus saving fuel expense. The finish is handsome, different from all others, and easy to keep clean and bright, a most desirable feature in a summer range. People who use it admit nothing else but their perfect satisfaction, and satisfaction is the one thing desired in a cooking apparatus. Every cent of the cost is in the superior merit of the range. We put it up and make connections without extra charge.
